## III. Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The question whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been and will not be examined in respect of:

- ☐ the entire international application,
- ☒ claims Nos. 1,2 and 4-43

because:

- ☐ the said international application, or the said claim Nos. \_\_\_\_\_ relate to the following subject matter which does not require international preliminary examination (*specify*):

- ☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. 1,2 and 4-43 are so unclear that no meaningful opinion could be formed (*specify*):

In these claims, the variables (e.g. R, R1, R2, U, X, Y, Z, etc...) and their voluminous complex meanings and their many permutations and combinations make it difficult to determine the full scope and complete meaning of the claimed subject matter. As presented, the claimed subject matter cannot be regarded as being a clear and concise description for which protection is sought and as such the listed claims do not comply with requirement of PCT article 6. Thus it is impossible to carry out a meaningful search on the same.

- ☐ the claims, or said claims Nos. \_\_\_\_\_ are so inadequately supported by the description that no meaningful opinion could be formed.
- ☐ no international search report has been established for said claims Nos. \_\_\_\_\_

2. A meaningful international preliminary examination cannot be carried out due to the failure of the nucleotide and/or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions:

- ☐ the written form has not been furnished or does not comply with the standard.
- ☐ the computer readable form has not been furnished or does not comply with the standard.

## V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

### 1. STATEMENT

Novelty (N)	Claims <u>3 and 44</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>3 and 44</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>3 and 44</u>	YES
	Claims <u>NONE</u>	NO

### 2. CITATIONS AND EXPLANATIONS

The invention relates to benzoimidazolyl derivatives and their pharmaceutical use. Considering the prior art cited Dongwei Cai et al in the search report claim 3 and 44 of this invention is novel. Claims 3 and 44 meet the criteria set out in PCT Article 33(2)-(4), because the prior art do not teach or fairly suggest the compounds as described in this application. Claims 3 and 44 meet the criteria set out in PCT Article 33(4), and thus claims 3 and 44 have industrial applicability because the subject matter claimed can be made or used in industry.
